

To Whom it May Concern,

To the best of our knowledge and to the degree that the seeds were represented to us, the American Organic Seed Company ascertains that our products while in our control and possession or during the production process were not modified with genes that would be considered "Genetically Modified Organisms" (GMO's). We do not guarantee that any of these products are 100% free of the adventitious presence of GMO's.

This statement relates to the following seed for the year 2013.
 Art Scheele, Owner - American Organic Seed
