September 12, 2016

To Our Valued Customers,

While current rules regarding tax exempt status have not changed in relation to agriculture seed sales, we are making a copy of the Illinois Department of Revenue Tax Form ST-587 available for your convenience. Our accountant has strongly recommended that we keep a completed copy for each of our customers on file. If you have already completed the form and returned it to our office, you do not have to complete another. If you are unsure if you have provided a completed form to us, you may contact our office or simply complete the form again and return it to us.

Although this form is not specific to seed sales, this is the applicable form we have been advised to use. **The only parts of the form you will need to complete are Step 2 and Step 6. The other steps are either already filled out or do not apply.** The completed form, returned to our office, will satisfy the requirements of the Illinois Department of Revenue for both us, the seller, and you, the purchaser.

We appreciate your business and thank you for your cooperation.

Respectfully,

John Widick  
General Manager
